CPE LAWS

and Professional Practice

Presented By : Engr. Joel C. Ananias

LAW

- Peaceful
- Fair
- Organized
- Just

LAW

Law is a set of rules and principles created and enforced by the government or authority to maintain order, protect rights, and ensure justice in society.

It tells people what they can and cannot do, and provides consequences or punishments for those who break the rules.

PROFESSIONAL PRACTICE

refers to the application of knowledge, skills, ethics, and laws in performing one’s duties as a Computer Engineer.

It includes project management, teamwork, communication, and adherence to engineering standards.

Practicing professionalism means showing integrity, accountability, and excellence in every task or project handled.

QUESTIONS:

°What is law?
°What is the importance of law?
°If you were going to change a law, what would it be and why?
°If you were given a chance to add a law, what would it be and why?
°How does law affect our daily lives?
